

## GLISTER® 680 SG

Active constituent: 680g/kg glyphosate (present as mono-ammonium salt)

### When Dry is Good...

Product Features	Packaging
Fully loaded with built in surfactant	15kg sealed disposable bags
Excellent performance in hard water – the formulation contains some Sulphate of ammonia	Concentrated - less handling and storage
Quick brown out	Delivered on plain pallets
Excellent solubility and stability when mixed	1 x 15kg carton is equivalent to approx. 23L of Glyphosate 450g/L or 19L of 540g/L
Free flowing extruded granule	No drum muster levy
Aerial application	No drum deposits
Easy spill management	
Great value	

### GLYPHOSATE CONVERSION CHART

GLISTER® 680SG (Dry)	Glyphosate 450	Glyphosate 540	Glyphosate 570
238g	360mL	300mL	284mL
530g	800mL	667mL	631mL
662g	1L	833mL	790mL
794g	1.2L	1.00L	947mL
993g	1.5L	1.33L	1.26L
1.3kg	2L	1.67L	1.55L
1.65kg	2.5L	2.08L	1.97L
1.98kg	3.0L	2.5L	2.37L
2.65kg	4.0L	3.33L	3.15L
3.30kg	5.0L	4.16L	3.95L
3.97kg	6.0L	5.00L	4.74L

<b><u>Registered Use Situations:</u></b>	<b><u>Mixing Guide:</u></b>
<ul style="list-style-type: none"> <li>• Broadacre</li> <li>• Sugar Cane</li> <li>• Cotton</li> <li>• Horticulture</li> <li>• Vineyards</li> <li>• Forestry</li> <li>• Domestic</li> <li>• Commercial/ Industrial</li> </ul>	<ul style="list-style-type: none"> <li>• Compatibility: Good product mixing as per standard glyphosates.</li> <li>• Mixing for booms: do not use less than 6L of water per kg of Glister® 680SG.</li> <li>• Add Glister® 680SG to a half full tank to ensure thorough mixing and agitation.</li> <li>• Add Glister® 680SG first and any additional surfactants last</li> </ul>

<b>Common Compatibilities</b>	
<i>Active</i>	<i>Trade Name examples</i>
Oxyfluorfen	Sinon Gowel® 240EC
Triclopyr	Sinon Syndicate® 600EC
Trifluralin	Sinon Trampoline® 480EC
Clopyralid	Sinon Psclop® 750SG
Atrazine	Sinon Atrazine 900WG
Simazine	Sinon Simazine 900WG
Metsulfuron Methyl	Sinon Pardnar® 600WG
<i>And many others. We advise you to jar test if you are unsure of compatibilities</i>	

## Glister® 680SG – Use Tips

- Ensure application to actively growing weeds and that they are not affected by water logging, stress, frost, disease or insect damage and are not covered in excessive dust. Reduced weed control may occur in any of these cases.
- Rainfall or irrigation shortly after application may wash the product from the target weeds; do not treat if rain is imminent.
- No withholding period applies to stock, but time needs to be allowed for absorption into the target weed for effective results.
- Avoid application in temperatures over 30 degrees. If applying when temperature exceeds 25 degrees, ensure water volume is at least 30L/ha and droplet size exceeds 300 micron VMD.
- Avoid drift! Glister® 680 is a non-selective herbicide and may cause damage to non-target plants in drift situations.

Glister® 680SG is a registered trademark of Sinon Australia Pty Ltd.
